

RUSS EQUIPMENT PTY LTD

DUAL STEER CONVERSIONS

There is a Russ Dual Steer vehicle suitable for all applications. Contact Russ Equipment Pty today to discuss a solution designed to meet your specific needs.

MULTI PURPOSE HEALTH VEHICLE (MPHV)

FLEET USAGE MAXIMISATION

Russ Multi Purpose Health Vehicle provides an economic solution for local authorities by providing full utilisation of small vehicle fleets. Picture is a free standing demountable Russ MiniFactor ideal for Councils with limited finances.

The Russ MPHV requires no tipping as it is fitted with horizontal ejection. The versatile Technamics Hookloader can efficiently and safely mount and dismount empty or loaded body configurations onto the vehicle. Once loaded the Technamics Hookloader unit can tip to angles of up to 45 degrees.

Technamics Hookloader's are recommended for their versatility, finish and operational speeds.

Any body configuration that meets the skid sub frame dimensions can be converted for use with this system.

Septic cleaning, water carriers, firefighters or even portable sheds can be adapted for this fast, economical and safe system.

TOMMYVAC

The Australian built TommyVac steel vacuum unit offers the perfect compliment to the Russ MiniFactor when vacuuming of leaves, bottles, cans, bark and dry mulch is required. Russ will fit and install a TommyVac to your new or existing vehicle.
